Revolutionary Innovations

Composite Honeycomb Panels
The Ultimate Challenge in Engineering

The World of Honeycomb Panels

ATL HonCorZ offers the perfect trade off between paper honeycomb and the conventional structural material used (aluminum, wood, etc.). It offers the best of both worlds as it is light weight yet strong, water proof and termite proof. The fact that HonCorZ is 100% recyclable makes it an environment friendly material.

Ultra Lightweight - Ultra Strong

Plastic Honeycomb by Anjani is a closed structure from both ends and hence continuous, which binds the surface and makes the structure stronger and the best in the honeycomb industry.

Available in Polycarbonate (PC) and Polypropylene (PP) material, HonCorZ is not only shatter-proof and unbreakable but also light weight factoring from the inherent properties of plastic.

HonCorZ combines a technical element, the polycarbonate "visual grade" core, and an emotional one, due to the light effects created within the internal cells which brings to life the composite panel. It is a composite panel characterized by lightweight, stiffness, translucency and design. No other product has at the same time these four features, which make HonCorZ exclusive and unique. No other product has at the same time these four features, which make HonCorZ exclusive and unique.

Application: Flooring, Roofing and Ceiling, Partitions and Wall cladding, Doors and windows, Furniture (Table, Desk, Cupboard, etc.), Interior decoration, Porta-cabins, Structures with backlit effects, Material handling pallets, Cleanrooms, etc.

Features:

- Light weight, yet strong
- 'Backlit' effect
- High strength to weight ratio
- Can be made fire retardant
- Acoustical and vibration dampening
- Weather proof
- Corrosion and fungi resistant
- Easy to fabricate and install
- Good thermal and electric insulation
- Exceptionally flat surface

Honeycomb Door Filler The Ultimate Solution

Why HonBoardZ?

- ✓ Weather proof
- ✓ Water proof
- ✓ Termite proof No need for fumigation
- ✓ High strength to weight ratio
- ✓ Self supported material
- ✓ Sound and vibration dampening
- ✓ Environment friendly
- Stability, flat surface and level for tile installation and flooring fixing planes.
- Strength to withstand live and dead service loads to increase building life.

About us:

With Design Excellence of Honeycomb, the World's Lightest yet Structurally Strong Plastic Pallets now brought to India by ATL. This revolutionary technology, exclusively being used in making extreme applications such as Aircrafts & Marine Vessel Building, is now available as 'HonCorZ' and is suitably customized to make the Material Handling Pallets for all Industry Applications. Every industry has been exploring the substitute of the Wooden Pallets but the available solutions in market are non friendly to your material but also to your budgets. Hence, ATL brings you the absolute synergy in its Honeycomb PalletZ - a Unique & ultimate solution for All Weather Safe & Secured Material Handling & Storage needs.

Business Vertical:

Composite Honeycomb Panels

- Architecture & Interior Decoration Solution
- Construction and Infrastructure
- Material Handling Pallets
- HonDoorZ - Door with honeycomb core
- HonBoardZ - Boards with honeycomb core

Sheets Extrusion

- ABS Sheet
- Decorative Sheet - DecoZ
- High Impact Polystyrene Sheet (HIPS)
- Polycarbonate (PC) Sheet
- Polypropylene (PP) Sheets
- Polystyrene (PS) Sheet
- High Density Polyethylene (HDPE) Sheet

Safety & Security

- Bullet proof Jackets, Helmets and Shields
- Personal Body Armor
- Hard Armor Insert Plate
- Vehicle Armoring
- Riot Control Equipment

Engineering Components

- Component Engineering & Tools
- Metal Parts & Precision Tools

Molding & Thermoforming
