

# Pressurised Containers for Missiles and Ammunition

Feel Secure

Introducing the world's lightest and pressurised packaging solutions for the Indian Defence to increase the shelf life of missiles and to overcome the weight related logistic restriction in the battle field.

**ATL** is an exclusive manufacturer and supplier for pressurised missile containers to Government of India for **AKASH MISSILE** project.

The advanced and indigenous patented composite honeycomb technology from ATL facilitates easy and direct loading of missiles from transportation vehicles to the launcher too save on the crucial time of warfare action.

# Inert chest for Safe Transportation of Missiles

Feel Secure

## Unparalleled Features

- Inert to moisture & protected from corrosion & rodents
- Protect the telemetry system during long shelf life
- Expected longer shelf life of Missiles
- Guaranteed performance in all weathers, terrains and adverse conditions
- Lightweight composite technology allows you to carry more weight under the same logistic restrictions in battlefield

Compatible with Cover & MTV for Safe Transit

MTS for Space Optimization
